Project 2 Part 2

Answer each of the following questions in BLUE colored font. Include all the required images and clearly label everything.

Project:

a. Include name of the team members.

Lloyd Abernathy, Joshua Ludwig

b. Who is responsible for what? 1-2 sentences against each team member.

We will be working in tandem on most of the parts of the project.

c. How are you sharing codebase? 1-2 sentences.

We will be sharing code through GitHub repository.

Database:

d. By this assignment submission date, you should have your raw data set imported in MySQL server in a megatable. You should also have started working on decomposition.

Include screenshots of CREATE TABLE statements that you have completed/ working on. This includes your megatable (required) and any other tables that you have designed.

Include screenshot of fetched data from your megatable by running a simple query like following (required):

SELECT * FROM megatable LIMIT 100;

Include screenshot of any other relevant code blocks. Clearly label the screenshots.

e. In terms of percentage how much you think you have completed on database side of the project? Describe the completed work in 2-3 sentences. Describe roadblocks, if any.

Front end:

f. By this assignment submission date, you should have decided on the front-end application programming language and have a successful connection established between the front end and the project database.

Attach a screenshot of the browser showing a successful connection displaying some data from any table of your project (can be megatable). Clearly label the screenshots.

g. Which front end application programming language are you working with? Has anyone from team has prior knowledge of working with front end? Has anyone from team has prior knowledge of working with the chosen front end application programming language. 2-3 sentences.

We plan on using JAVA server pages, and java database connectivity, to code our front end web application. As well as HTML.

h. What is the status of front-end application? In terms of percentage how much you think you have completed on front-end side of the project?

Next deliverable

- What are your next steps? By next deliverable (in 10 days) what do you plan to complete? Define clear goals.

Submission:

Complete this document and save it as pdf. You must submit a PDF file named **p2-part2-lastname1-lastname2.pdf** (For example if I submit this document with John Smith, I would name it p2-part2-singh-smith.pdf). Submit your files on Brightspace.

You must include your name and your partner name in the Brightspace submission text box.

Each member of the team must make the submission of same file.

Grading:

This Assignment will be graded on the following criteria:

1. Completeness of document.

2. Completeness of required components at this stage of project.

3. Clear evidence of work completed.
